**~~17.34.050 Yard regulations.~~**

- ~~A. Side yards shall have a minimum of twelve (12) feet on one side which has no encroachment (to provide vehicular access to back yard) and eight (8) feet on the other. The total width of the two required side yards shall not be less than twenty (20) feet. On corner lots, the side yard width which faces the street shall not be less than thirty feet for main and accessory buildings. Also, on corner lots the back yard thirty foot (30') setback shall be allowed on the long axis of the property, irrespective of which street the house faces.~~
- ~~B. The minimum setback for main building front walls shall not be less than thirty (30) feet from the property line. An exception is allowed if the other houses on the block, on the same side of the street, are setback less than thirty (30) feet. In this case the setback shall be the average the existing buildings, but in no case shall setback be less than fifteen (15) feet.~~
- ~~C. Attached garages are considered a part of the main building for purposes of establishing front, side and rear setbacks.~~
- ~~D. Detached garages may be emplaced at the thirty (30) foot front setback line but the combination of house and garage must still meet the side yard setback stipulated in "A" above if the front of the garage is not behind a line established by the back wall of the house.~~
- ~~E. Detached garages emplaced elsewhere on the lot shall have minimum side and rear setbacks of one (1) foot.~~
- ~~F. All other accessory buildings (ie sheds, barns, etc.) shall be emplaced at least ten (10) feet to the rear of the main building and have minimum side and rear lot line setbacks of one (1) foot. In no case shall any portion of the structure extend beyond the lot line. Persons wishing to deviate from this standard may seek exception by presenting a design for review to the Planning Commission. The Planning Commission will consider structure design, landscaping, proximity to neighboring dwellings, and other pertinent data.~~
- ~~G. The minimum rear yard depth from any main building shall not be less than thirty (30) feet.~~
- ~~H. Front setback will be measured from the property line to the nearest point on the front wall of the structure with the following exceptions:
  - ~~1. When a porch extends toward the street having a roof supported by columns. The measurement will be made to the closest column.~~
  - ~~2. When a structure has an extended roof overhang or porch roof in excess of two feet, the setback will be~~~~

~~measured to the front edge of the roofline and will be reduced to a twenty eight (28) foot minimum.~~

~~3. Where both extended roof overhang and support columns exist, the measurement will be made to whichever point (overhang or columns) that yields the greater setback.~~

~~I. Side setback will be measured from the side property line to the nearest point on the side wall of the structure with the following exceptions:~~

~~1. If any portion of the structure (except the roof), extends closer to the property line than the side wall, it will become the measurement point (e.g. bay windows, foundations, etc).~~

~~2. When the side roof overhang extends more than two (2) feet beyond the wall. Side setback will be measured from the property line to the roof edge. The required minimum will be reduced by two (2) feet. (Example, a roof overhang extends three (3) feet out from the side wall and a twelve (12) foot setback is required on that side. The adjusted setback of ten (10) feet would be measured from the property line to the edge of the roof).~~

~~1. If a covered patio is attached to the house, the rear wall of the patio will become the measurement point.~~
