Mayors Message – Summer has arrived!

Hyrum hosts a patriotic Star Spangled Celebration each year. My favorite part of all the events is the Patriotic Program held on the City Square the Sunday before July 4th. The flag raising, patriotic music, recognition of those Hyrum residents who have lost their lives protecting our freedoms, recognizing audience members who have served in the armed forces, celebrating members of our community who have done so much for

the city, and a fantastic speaker to add to the patriotic feeling of the event. Through the years my family has enjoyed the youth parade and water fight with the firemen, the rodeo, parade, teen dance, and firework display that is part of the celebration. I look forward to the upcoming celebration and invite you to celebrate with us.

I am grateful to live in the United States and to enjoy the liberties and freedoms we have been blessed with. I love the city of Hyrum and the people who live here and thank you for all that you contribute to making our community a wonderful place to live!

Sincerely,
Mayor Stephanie Miller

Cabin Candy Store - The cabin candy store located just west of the Hyrum Library will be opening Tuesday, June 5th for the summer. The cabin candy store will be open Tuesdays, Thursdays, and Fridays from 11:00 a.m. to 2:00 p.m.

Cache Mosquito Abatement District - Believe it or not, mosquito season is just around the corner! Our community is part of the Cache Mosquito Abatement District (CMAD), which seeks to reduce the risk of mosquito-borne illness, especially West Nile Virus (WNV), as well as alleviate the nuisance of mosquitoes. The first line of defense is to reduce mosquito breeding habitat through prevention. There are many things you can do around your home to help control mosquitoes.

Drain standing water around your house in the form of clogged gutters, children's toys, pet water dishes, and birdbaths. It only takes a small amount of water (half a cup!) to provide a breeding area for thousands of mosquitoes. Empty pet dishes and bird baths a couple of times a week to get rid of any mosquito eggs or larva.

The second line of defense is the use of larvicide. Several of the compounds used by CMAD target only mosquito larva and do not harm other water-based organisms, mammals, or the environment. If you are aware of standing water which may potentially become a breeding ground for mosquitoes, please contact CMAD by calling 435-764-6839 or by emailing cmad.cache@gmail.com. CMAD spends nearly three times as many hours larviciding compared to fogging, as larviciding is much more effective. In addition, carbon dioxide traps are distributed throughout the District to track numbers of mosquitoes. This surveillance allows them to be identified by species and tested for the presence of WNV and other diseases.

Finally, fogging or spraying with a permethrin-based pesticide generally occurs when adult mosquito numbers are high enough that they present a disease risk as well as an increased nuisance level. CMAD usually begins fogging in June and ends in September, depending on weather conditions. Fogging is only effective from dusk to the early hours of the morning, so that is when you will see/hear trucks going through the community. Trucks are equipped with flashing lights to enable citizens to more easily see them coming. Please use caution when you see a truck and do all you can to avoid the spray, such as rolling up car windows or moving away from the roadside until the truck passes. Though the spray is not toxic to humans, it is of course desirable to avoid contact when possible.

A fogging schedule by community will be posted on the CMAD website at www.cachemosquito.com. The schedule will be available at the end of May/beginning of June, and other information about mosquito abatement is available on the website as well. We send our best wishes for a safe and happy summer season!
